Agility, Communication, And Speed Are The Missing Links To Innovation

For Application Development And Delivery Leaders

FORRESTER®

**INCREASE AGILITY TO DELIVER FASTER AND MEET BUSINESS NEEDS**

CEOs see delivering software faster to meet business schedules as **2.3x** more important than software leaders

Only around **half** of companies are delivering software faster to meet business schedules

C-SUITE AND SOFTWARE LEADERS MUST WORK TOGETHER TO DELIVER FOR CUSTOMERS

The relationship between the CXOs and software leaders is fundamentally broken

85% of software leaders claim they lack executive support

but only **5%** of CXOs agree

LEADERS SUPPORT AGILE, BUT THEIR PRACTICES DON'T BACK IT UP

82% ranked the importance of scaling Agile/DevOps to achieve business outcomes as **important** or **critical**...

...but only **8%** of software leaders want to work in an Agile environment.

Ideal Software Requirements Development And Refinement

● Most Agile   ● Medium Agile   ● Least Agile

9% Minimal requirements compiled prior to software design and development; elaborated during iterative delivery with regular review and reprioritization based on user and team feedback.

67% Complete requirements compiled prior to software design and development; reviewed and reprioritized regularly based on user and team feedback.

25% Complete requirements compiled prior to software design and development with few changes during project.
